Professional Summary

Motivated Computer Science undergraduate at Indian Institute of Information Technology Manipur with strong foundations in Data Structures, Algorithms, and modern web development. Experienced in building responsive web applications using React.js, TailwindCSS, and JavaScript. Passionate about problem solving and scalable software development with 250+ algorithmic problems solved on LeetCode.

Education

Indian Institute of Information Technology Manipur

Imphal, India

Bachelor of Technology (CSE)

Aug 2024 – May 2028

Senior Secondary (Class XII)

2024

Percentage: 86.6%

Secondary (Class X)

2022

Percentage: 87.6%

Experience

Undergraduate Research Fellow

Jun 2026 – Present

TEXMiN (IIIT Manipur Mining CPS CoE)

- Developing SENTINEL-MINE: AI-predictive geofencing & hardware safety interlock.
- Researching sub-surface anomaly detection under Dr. Nongmeikapam Kishorjit Singh.

Relevant Coursework

- Data Structures and Algorithms
- Object-Oriented Programming
- Web Development
- Software Engineering
- Database Management Systems (SQL)

Technical Skills

Languages: C, C++, Python, JavaScript, R

Frontend: HTML, CSS, React.js, TailwindCSS

Tools: Git, GitHub, VS Code, GSAP

Core Concepts: Data Structures, Algorithms, OOP, Basic Machine Learning

Projects

Ahouba Website (IIIT Manipur Tech Fest)

Live: ahouba.com

- Contributed to development of official fest website.
- Built responsive UI using React.js and TailwindCSS.
- Integrated animations using GSAP to enhance UX.
- Reduced bundle size by 30% through optimization.

Task Scheduler Dashboard

C++, Qt6, CMake

- Developed a desktop-based task management application with modern GUI.
- Designed prioritization engine using importance, deadline, and effort.
- Built daily planning system with tracking and auto-scheduling.
- Implemented auto-save and local data persistence.

Wingull's Catch (2D Game)

HTML, CSS, JavaScript

- Developed 2D browser game with smooth 60 FPS rendering.
- Implemented dynamic difficulty, stamina system, and power-ups.
- Added high-score tracking using local storage.
- Designed responsive UI with real-time feedback.

Developer Portfolio Website

- Built personal portfolio to showcase projects and skills.
- Designed responsive UI using TailwindCSS.
- Added animations using GSAP.
- Optimized performance and accessibility.
- Implemented custom light/dark theme toggling with smooth transitions.
- Achieved 100/100 Lighthouse scores for SEO, Accessibility, and Performance.
- Deployed on Vercel with CI/CD pipelines for automated testing and deployment.

Competitive Programming

- Solved 250+ problems on LeetCode (arrays, strings, recursion, DP).
- Practiced regularly on HackerRank and Codeforces.
- Participated in coding contests with strong rankings.

Certifications

- Problem Solving with C++ and Python (LeetCode)
- Web Development with React and JavaScript (Self-learning)

Achievements

- Strong academic performance in Computer Science.
- Built multiple real-world projects.
- Optimized performance and implemented advanced UI animations.
